"IF I COULD ONLY GET UP THAT GAS I Know I Would Feel Better."
How often have you felt that way? How often have you wished for something to give you genuine and lasting relief from gas?

Don't buy any ordinary dyspepsia tablets for temporary results. Go to a first-class drug store and ask for a bottle of genuine Baalman's Gas Tablets. Take three tablets an hour before meals and again three after eating—then atch. Now comes a surprise. No more gas, no more smothered feeling, no difficult breathing, no bloating.

Remember, Baalman's Gas Tablets are not only for the relief, but also for the prevention of gas. Most people with gas suffer from nervous dyspepsia—not common indigestion.

Baalman's Gas Tablets in the famous yellow package, price one dollar, are sold by

ONE OF EVERY FOUR NEW YORKERS HAS MONEY IN THE BANK

(By Associated Press)

New York, Nov. 13.—The popular idea that the term "New Yorker" is synonymous with prodigality in expenditures for unimportant things, extravagance in dress and style of living and outlay for bright light amusements, is refuted by some significant figures just compiled by the Merchants' Association.

On July 1, 1922, the savings banks of New York held on deposit \$2,069,779,823.85, representing accounts of 1,680,625 depositors, or more than one out of every four of the entire population.

"These figures," said the statement, "are as significant relatively as positively. They prove that the habit of thrift among the wage earners in the city has grown enormously during the last twenty-five years."

"In 1897 the books of the New York savings banks showed deposits to a total of \$529,907,247.75. The actual deposits in that period have therefore multiplied almost four times. Within the same period the number of depositors has increased from 1,222,366 to the total as indicated above. It is true that the increase in numbers of accounts is not commensurate with the increase in population, but a significant fact appears in the per capita comparison. The depositors of 1897 showed an average savings account of \$432.51 while the depositors of today show an average savings deposit of \$1,231.55."

"Those who analyze the significance of figures may draw various deductions of interest from these remarkable showings which are ewly assembled, but any argument tending to show that New Yorkers in general are a wasteful lot would have some difficulty in maintaining itself unchallenged."

TANGIBLE ENCOURAGEMENT

By HARRY
"God gives all things to Industry." When Benjamin Franklin made that statement he knew nothing of a modern bugbear which has arisen to hang suspended over our heads the entire year and then at a certain period swoops down and entangles us in a very labyrinth of figures. This is the federal income tax.

The United States government, true to Franklin's prediction, co-operates with the Building and Loan Associations by granting an exemption from this tax to interest or dividends from these institutions to the amount of three hundred dollars. This, at five percent interest one may have a deposit of \$6000.00 free from income tax.

Congress evidently realizes the need of money for buying and building homes and encourages the people to save for this purpose. This exemption, coupled with the 6 per cent rate of interest and the absolute security of savings renders the Building and Loan association the ideal savings institution.

We took the "If" from "Thrift."
